

Business & VC trolley

062.2900 Business & VC trolley electric height adjustment, max. 98 inch 180 kg

Besides our standard trolleys with and without height adjustment, used mostly in education, we have made available a range movable solutions for the use of (touch-)flat panels and VideoConference in the business market. These trolleys have a luxurious look and feel and offer the space to easily place your peripheral equipment out of sight in the enclosure. Available are several accessories to build-in such equipment and for a VideoConference camera or a soundbar are easy to mount adapters available.

De 062.2900 is a solution on wheels and offers an electrically adjustable highest position for monitors max. 98 inch with a maximum weight of 180 kg. The monitors centre can be freely determined from 1400 - 1900 mm from the floor; making the trolley ideal for use in meeting rooms and (compact) boardrooms. In case a fixed position of the monitor is preferred, one could opt for one of the other trolleys. Of course the SmartMetals team is there to help with advise and making the proper choice for your installations.
